Imsil Ttadam Farming Association Corp Introducing 'Ttadam'

- Ttadam Farming Association Corp Introduction
- Ttadam Farming Association Corp History

Small but Strong Agrifood Ttadam is Growing as A Farmer

Ttadam started as the 'Agricultural Product Processed Food Research Association' by Insil-gun region farmers. After completing a start-up education program, a farming association corporation was founded and the co-brand 'Ttadam' was created.

The Insil Ttadam Farming Corp produces fruit and vegetable drinks, bottled products, jams, syrup, powdered products and many more. Furthermore, Ttadam is gaining competitiveness as a food manufacturer with top graded ingredients and distinguished processing methods.

Home of Fruits, Healthy, Nature Friendly Foods of Imsil

Imsil is located in the middle of a mountainous region and is surround by the Seomjin river and the Okjeon lake. Known as a Home of Fruits, Imsil is a clean area with clear water and fresh air where it is perfect for fruit cultivation. In fact, all fruits produced in the area are known for its excellent flavor and are often praised nation wide as one of the best fruits available.

Imsil, also famous for its cheese theme parks and its red peppers, produces agrifood that can be consumed without any worries.

Fruit and Vegetable Products with Rich Flavor and Nutrients Due to Wide Daily Temperature Range

Imsil possess a wide range of daily temperature range, and the farms within the region also have hydroponic (nutrient solution bench) farming equipment ready, allowing local farms to produce fruits with constant taste and quality with years of cultivation know-how. Furthermore, with GAP certification acquired through utilizing micro organisms, farms are able to produce fruits with hard pulps that retain their quality even during storage. With these qualities, the fruits are being completely supplied to renown marts in Jeonju-si and other regions.

Imsil Black currant Farmers

Imsil Nature creates Farm Mr. Kim, Donghun, Ms. Jang, Yeongeun

Blackcurrants are rich in taste, scent, color, and nutrients. Excels in variety of functions, possessing sweet taste and deep scent, dark purple colored like the grape, the blackcurrant are rich in number of vitamins and special nutrients. When compared to other berries, the blackcurrant has a higher concentration of vitamin C, anthocyanin, and polyphenol. Furthermore, research have shown that anthocyanin are capable of enhancing the reconstruction process of rhodopsin, a protein found in the retina.

Imsil Ginger Farmers

Imsil On a picnic Farm Mr. Lee, Yeonsang

Gingerol and shoggaol, substance that is responsible of the characteristic spicy ginger taste, helps keeping the body temperature warm and enhancing the immune system. Furthermore, gingerol and shoggaol delivers oxygen and nutrients throughout the body, helping blood circulation and increases body temperature. With anti-inflammatory properties, ginger helps reducing inflammation in the nose and throat. Customers often find ginger for Covid suppression, and during winter, and in-between seasons. Also the warmth of the gingerol is helpful for enhancing body temperature.
